Goodwill Youth Aerospace Program
Marysville WA

Letter of Recommendation

Mr. Shawn Palmer
The Leadership Coalition

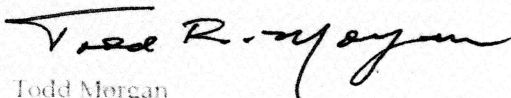

To Whom It May Concern,

Our Youth Aerospace Program is an intense training program emphasizing soft skills and communication in preparing students for life and career choices. Many of these students face significant barriers including difficult living situations, poverty and cultural challenges. This group of students and staff experienced the privilege of expert leadership and a well-presented program for an entire day with significant and measurable results for everyone in attendance.

Mr. Palmer extended tremendous effort and commitment to his product in preliminary research, communication and follow through when engaging with the staff and helping define the measured deliverables to best benefit our program. This allowed the staff to prepare ahead of time for a determined outcome of our choosing, which was realized beyond expectations. This was an excellent, well-prepared and powerfully-presented program, which engaged our students throughout the day's activities. Significant opportunities were provided for every student to participate, interact and communicate on multiple levels of relationships.

Mr. Palmer's leadership was exceptional and consistent as it often required patience and professional experience in addressing difficult students and behavior issues; and he deftly demonstrated integrity and forthrightness. Mr. Palmer provided a structured yet light-hearted and personal delivery of this innovative leadership curriculum, which ensured the dignity of each student. We as a youth aerospace staff highly recommend The Leadership Coalition to youth and adult groups who are interested in challenging participants to excel and pursue greatness both personally and professionally.

Respectfully submitted for your thoughtful consideration,

Todd Morgan
